

In the 1950s Congress approved relocation of the National Bureau of Standards (NBS) from Washington, DC to Gaithersburg, MD. The architectural firm of Voorhees, Walker, Smith, & Smith was hired for the project due to their experience with the design and construction of laboratories. (The firm's name changed several times during the project.) In the early 1960s the firm produced architectural renderings in watercolor that reflected the campus-like environment NBS staff wanted. The new NBS facilities were dedicated on November 15, 1966. This watercolor shows the firm's vision for the front Gate House.
