Velma Burns of the National Bureau of Standards Photometry Division in 1961. She is adjusting a photoelectric cell used for luminance calibrations. She helped develop luminance calibration techniques to achieve uniformity of brightness for television sets, aircraft instruments, and other light emitting products.

Computer engineer Cita Furlani is pictured seated at a workstation in the National Bureau of Standards' Automated Manufacturing Research Facility the early 1980s. Furlani and her colleagues used the facility to research the integration of computers, robots, and machine tools to develop and improve automated manufacturing.
